

Prevention, Protection & Compliance

Without Compromise

When looking for a company to complete your electrical safety compliance work, it is not only important to get value for money, but work that is completed to the standard that is required.

At Jim's Test & Tag, we pride ourselves in having the best trained people for the job and provide you with a "competent person" to complete all your work. We encourage our future customers to do the research required to get the best fit for their requirements. The table below is provided for you to use when completing your comparison.

Checklist	Option 1	Option 2	Option 3
	Jims Test & Tag		
All technicians Police checked	✓	<input type="checkbox"/>	<input type="checkbox"/>
Liability insurance in place	✓	<input type="checkbox"/>	<input type="checkbox"/>
All services certified to ISO9001 for quality	✓	<input type="checkbox"/>	<input type="checkbox"/>
All services certified to OHSAS18001 & AS/NZS4801 for health and safety	✓	<input type="checkbox"/>	<input type="checkbox"/>
All technicians hold current first aid certificates	✓	<input type="checkbox"/>	<input type="checkbox"/>
EFLI test before all tests*	✓	<input type="checkbox"/>	<input type="checkbox"/>
Test and Tag portable electrical appliances and leads	✓	<input type="checkbox"/>	<input type="checkbox"/>
Test and Tag safety switches – Residual Current Devices (RCDs)	✓	<input type="checkbox"/>	<input type="checkbox"/>
Test and Tag 3 phase equipment and leads	✓	<input type="checkbox"/>	<input type="checkbox"/>
Visual Inspection (including required guards fitted correctly)	✓	<input type="checkbox"/>	<input type="checkbox"/>
Safety device inspection and test	✓	<input type="checkbox"/>	<input type="checkbox"/>
Earth Bond	✓	<input type="checkbox"/>	<input type="checkbox"/>
Insulation Resistance test	✓	<input type="checkbox"/>	<input type="checkbox"/>
Polarity test (when required)	✓	<input type="checkbox"/>	<input type="checkbox"/>
Power Leakage test ALL appliances where possible **	✓	<input type="checkbox"/>	<input type="checkbox"/>
Microwave radiation leakages tests (optional test)	✓	<input type="checkbox"/>	<input type="checkbox"/>
Microwave Power output tests (optional test)	✓	<input type="checkbox"/>	<input type="checkbox"/>
Auditable reporting, Detailed Asset list, Detailed test results, Failed Items list (where required)	✓	<input type="checkbox"/>	<input type="checkbox"/>
Each appliance gets a unique barcode for tracking	✓	<input type="checkbox"/>	<input type="checkbox"/>
Data Management facility	✓	<input type="checkbox"/>	<input type="checkbox"/>

*EFLI Earth Fault Loop Impedance checks for the correct level of earth connectivity at the site. A faulty power point can result in a false pass result on the tester and can potentially mean an unsafe situation for employers/employees.

**Leakage test provides a reading of the power leaking from an appliance while in use. If this leakage is too high, it could be dangerous and result in electric shock. AS/NZS 3760 requires certain appliances to have this test however we choose to exceed the standard in some cases and leakage test all appliances where this is possible. This includes leakage testing of 3 phase appliances.
